Unofficial FHICT Template

An unofficial template for FHICT document generation.

v1.5.0

30-05-2024

TomVer99

https://github.com/TomVer99/FHICT-typst-template

This template allows the user to easily generate documents in the style of the Fontys Hogeschool ICT. The template provides a set style and layout for the document. It also provides a set of commands and macros to help the user generate content.

Table of contents

I.3. First Document	2
II. Available commands	
III. Issues	
IV. Index	

Part I.

Usage

I.1. Pre Requisites

To use this template, you need to have the roboto font installed.

I.2. Importing the template

To use this template, you first need to download the template.zip attached to the release. Extract the contents of the zip file to a folder on your computer. Afterwards, you can include this template in your file by adding the following line at the top of your file:

```
#import "some/path/fhict-template.typ": *
```

Your path may vary depending on the location of the template file. In the future it may also be possible to use:

```
#import "@preview/fhict-template:1.5.0": *
```

In this case you won't need to download the template file.

I.3. First Document

To create a document using this template, you can use the fhict_doc command.

This command has a lot of arguments to customize the document. Here is an example of a simple document:

Part II.

Available commands

```
⟨subtitle-lines⟩,
   ⟨authors⟩,
   ⟨version-history⟩,
   ⟨glossary-terms⟩,
   ⟨glossary-front⟩,
   ⟨bibliography-file⟩,
   ⟨citation-style⟩,
   ⟨toc-depth⟩,
   ⟨disable-toc⟩,
   ⟨disable-chapter-numbering⟩,
   ⟨pre-toc⟩,
   ⟨table-of-figures⟩,
   ⟨table-of-listings⟩,
   ⟨appendix⟩,
   ⟨watermark⟩,
   ⟨censored⟩,
   ⟨print-extra-white-page⟩,
   ⟨secondary-organisation-color⟩,
   ⟨secondary-organisation-logo⟩,
   (secondary-organisation-logo-height),
   ⟨enable-index⟩,
   ⟨index-columns⟩
)[\langle body \rangle]
  Renders a document in the style of the Fontys Hogeschool ICT.
  ⟨title⟩: "Document Title"
                                                                                                         str
    The title of the document.
  ⟨subtitle⟩: "Document Subtitle"
                                                                                                         str
    The subtitle of the document.
  ⟨subtitle-lines⟩: 1
                                                                                                         int
    The number of lines the subtitle should span.
```

```
Argument

(authors): none

The author(s) of the document. Has the following structure:

(
name: "",
email: "",
),

Name can be a string or complex type. Email must be a string. Email is optional.

If the name attribute is a complex type, it should have the following structure:

name: (content: [Tom #sensitive("V.")], string: "Tom V."),

Appart from using this complex type for sensitive information, there is not much use for it.
```

```
Argument

(version-history): none

The version history of the document. Has the following structure:

(
(
(
version: "",
date: "",
author: "",
changes: "",
),
...
)

All fields can be strings or content.
```

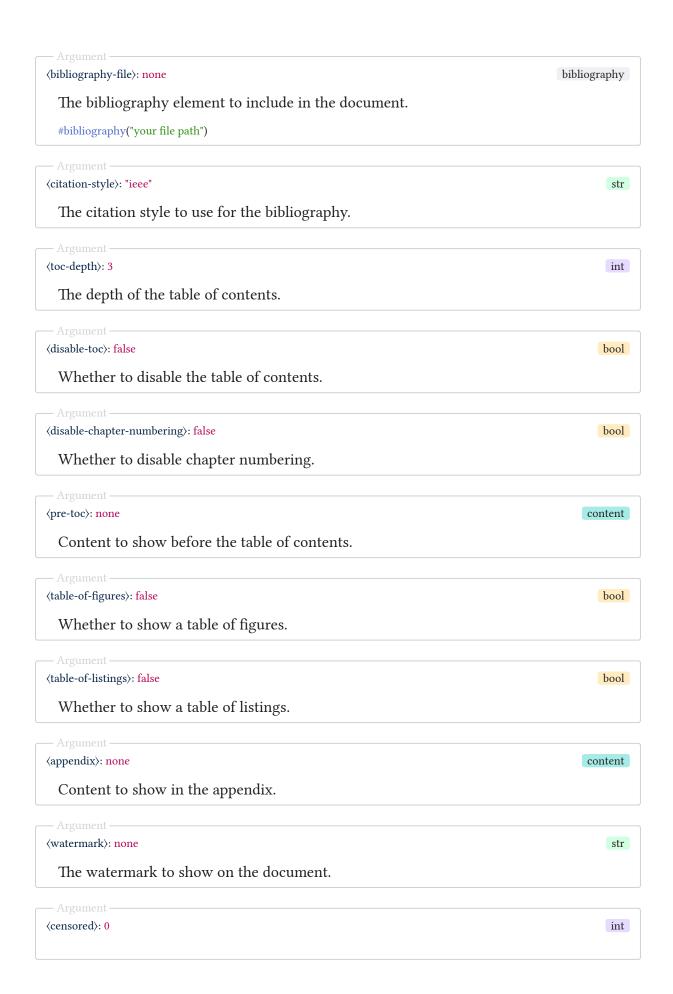

```
A dictionary of glossary terms. Has the following structure:

(
    (
        key: "",
        short: [],
        long: [],
        desc: [],
    ),
    ...
)

Where all options except key are optional.
```

```
Argument (glossary-front): false bool

Whether to show the glossary at the front of the document.
```

Whether to show a censored watermark on the document. 1 for censorship, 0 for no censorship.

bool ⟨print-extra-white-page⟩: false Wether to make sure the beginning of sections start on the 'right hand' page. This does not affect chapter headings. ⟨secondary-organisation-color⟩: none color The color of the secondary organisation. ⟨secondary-organisation-logo⟩: none read The logo of the secondary organisation. #read("your file path") $\label{eq:condary-organisation-logo-height} $$ \ensuremath{\langle} secondary-organisation-logo-height \rangle$: "6%" $$$ size The height of the secondary organisation logo. ⟨enable-index⟩: false bool Whether to enable the index. ⟨index-columns⟩: 2 int The number of columns in the index. content $\langle body \rangle$ The content of the document.

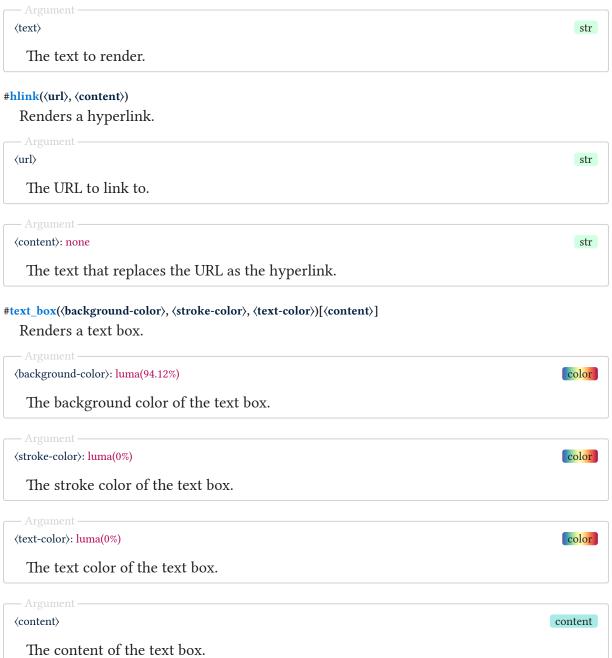

```
#fhict_table(
  ⟨columns⟩,
  ⟨content⟩,
  ⟨background_color_heading⟩,
  ⟨background_color⟩,
  ⟨text_color_heading⟩,
  ⟨text_color⟩,
  \langle top\_colored \rangle,
  ⟨left_colored⟩
  Renders a table in the style of the Fontys Hogeschool ICT.
  ⟨columns⟩: ()
                                                                                                 array
    The spacing of the columns.
 ⟨content⟩: ()
                                                                                                 array
    A 2D array of the content of the table.
    (header1, header2, ...),
    (row1, row2, ...),
    )
 ⟨background_color_heading⟩: rgb("#663366")
                                                                                                 color
    The background color of the heading row/column.
 ⟨background_color⟩: luma(100%)
                                                                                                 color
    The background color of the other rows/columns.
 ⟨text_color_heading⟩: luma(100%)
                                                                                                 color
    The text color of the heading row/column.
 ⟨text_color⟩: luma(0%)
                                                                                                 color
    The text color of the other rows/columns.
 ⟨top_colored⟩: true
                                                                                                  bool
    Whether the top row should be colored.
```

Argument — (left_colored): false bool

Whether the left column should be colored.

#sensitive(\langle textl\rangle) Renders a se

Renders a sensitive text block.

$\#lined_box(\langle title \rangle, \langle body \rangle, \langle line\text{-}color \rangle)$

Renders a box with a line on the left side.

Part III.

Issues

If you have any issues with this template, you can report them on the GitHub repository. Create a new issue and describe the problem you are experiencing. Also include the version of the template you are using, and your document if possible. If you have a solution to the problem, you can also create a pull request.
